WARNING! A cart equipped with this motor or private speed setting will increase the speed of the vehicle so that it will not conform to the speed criteria of the ANSI Z130.1 standard for golf cars safety and performance requirements. The user uses this product at their own risk.

STOP

Please review the following to be sure that you don't cause damage to your golf cart (i.e. batteries or electrical system.)

- **Check wheel lugs.** After your first few test drives in your custom cart and every few months, be sure to check the tightness of the wheel lugs to ensure they haven't loosened during use.
- **Charge your cart daily when in use.** Deep cycle golf cart batteries like to be cycled on the top 80% of their charge.
- **Water your batteries monthly.** Check your battery water level after the cart has been charged, ideally the water level should be a ¼" – ½" above the plates.
- **Do not over water your batteries,** this will lead to improper electrolyte ratio and bubbling over of your batteries while charging.
- Always **store your cart fully charged.**
- Always **put your cart in tow mode when working in the battery compartment.**
- **Be sure battery nuts are tight and secure!**
- Your cart is equipped with a regenerative braking system, you must **always put your cart in tow mode if you are pushing or towing it.**
- If the cart is **not being used for extended periods of time,** but you will still be around to charge it, then we suggest charging it once a month.

If you are uncertain about any procedures, refer to your owner's manual or contact SC Carts before proceeding.

QUICK MAINTENANCE TIPS

We are pleased to present you with an SC Carts Custom Golf cart! Your cart has been fully serviced and is ready to ride. The following are a couple tips to help ensure your cart performs its best for years to come! *This is just an overview for more detailed information please refer to the owner's manual:*

BATTERY MAINTENANCE TIPS:

WATERING:

- Check your water levels monthly!
- There should always be a minimum of a ¼" of water above the plates and approximately a maximum of a ½" of water above plates, you do not want to over water the batteries as it will dilute the electrolyte and potentially boil over while charging.
- Add water only after fully charging the battery pack BUT prior to charging, you must ensure there is water covering the plates. Keeping the water at the correct level after a full charge will prevent having to worry about the water level at a different state of charge.

CHARGING:

- Charge at every opportunity!
- Lead acid batteries like to be cycled, but do not like to be kept below 80% charge for any length of time. Periods of inactivity can be extremely harmful to lead acid batteries.
- If you use your cart for a short spurt and then park it there is no need to charge it, however if you use your cart for any length of time then it is recommended to charge the cart after each use and at the end of each day.
- When placing the cart into storage, it is important to ensure the batteries are completely charged and the cart is in the tow mode. During the storage period it is important to ensure you charge your cart once a month. If you are unable to charge the cart on a monthly basis, then one of our SC Carts battery maintainers is the best solution to ensure you protect the investment of your batteries.

WINDSHIELD MAINTENANCE TIPS:

We recommend using the soft blue Scott towels with an alcohol free or ammonia free foaming window cleaner. If there is excess dirt or dust on the windshield, prior to wiping the windshield, rinse it first with a hose or blow off the dirt with pressurized air.

Follow the above steps to keep your cart looking and operating as "healthy" as possible. Thank you for purchasing from SC Carts! Enjoy your ride,

Sincerely,
The Team at SC Carts (*Simolo Customs Ltd.*)

WARRANTY

Used Golf Cart Limited Warranty Terms and Conditions

SC Carts provides that the golf cart purchased in this sale is delivered in a fully refurbished state. This golf cart is used and therefore will show signs of normal wear and tear for its age. This limited warranty is in respect to parts only is extended to the Original Purchaser for defects reported to SC Carts no later than the following warranty periods for the vehicle parts and components set forth below.
